RE: Re-seeding, Wilson-Silverbell Mine, M/037/027 and Deremo-Peterson Mine,
M/037/025

Dear Mr. Baker:

The above referenced mines were disked and re-seeded in early October of 2004. The Wilson mine spoils pile was seeded on October 6th, and the Deremo-Peterson mine was seeded on October 7th. Attached are photographs of the area and the equipment used for seeding. A large disk pulled by a D-4 CAT was used to prepare the seed bed. ATV's were use to spread the seed, apply a small amount of fertilizer and harrow.

Also enclosed is a sample of the approved seed mix. If you have any questions please call.

Sincerely,

Rahe W. Junge
Site Manager
